

A multi-functional sliding bed trailer suitable for carrying a wide variety of loads. Suitable applications include transportation of wheeled and tracked plant, forklifts, access platforms, coach and vehicle recovery, ISO containers and general haulage.

THE 'OLDBURY SLIDER'

MOD 1983 model, still in service today.

"A wonderfully, flexible trailer acting as a semi low loader, a flat and a container carrier. A great work-horse for over 20 years."

RAF Stafford.

MOD 2003 model, 26 tonne payload. Ideal for plant movement.

■ Features

- 3 off ROR Axles
10 tonne drum-braked axles (Discs optional)
- Air Suspension
- ISO swing clearances
- Integral Rear Lighting
Rear lighting integrated in rear ramps
- Mechanical Sliding Bogie c/w locking mechanism
Simple pneumatically operated locks
- Electrical winch (Optional)
- 12 pairs of rope hooks
- 6 pairs of lashing rings in rave
- 1 pair of interlinked 2 speed landing legs
- Haldex 2S/1M ABS braking system

Ideal for vehicle recovery.

THE 'OLDBURY SLIDER'

■ Advantages

- No step frame allowing full utilisation of bed
- Ideal plant / vehicle recovery trailer
- Carries 10, 20, 30, 40 and 45ft ISO containers
- Ramps light enough for one man operation – no need for hydraulics
- Rear loading ramps are small, reducing drag and fuel consumption
- Simple one man operation of bogie locking mechanism
- No hydraulics offering low maintenance costs
